CAREER OBJECTIVE

I want to make my career in the IT industry specifically in web development has making interactive web design and how data flows from a client side to a server side intrigues me. I am fascinated by how we can make interactive UI and then connected with server just buy writing few lines of code I want to make my careers in back end but I also consider myself good at front end.

EDUCATION

2020
Jagruti vidhayalaya

commerce

Senior Secondary (XII), Gujarat Secondary And Higher Secondary Education Board(GSEB)
With 80.27%.

CERTIFICATIONS

2024- NOV

Apana college

Full Stack Devloper

I have learnt about frontend and backend along with handling databases,I have learned about both frontend and backend development, along with database management, using map APIs, and cloud storage. In addition, I have become familiar with the Redux Toolkit and Tailwind CSS. I also learned how to use GitHub effectively. using map APIs and cloud storage. In addition to that I have also learned to use Redux toolkit and tailwind. Also I got to know about GitHub and how to use it.

SKILLS

- MERN
- GitHub
